

Your Planning Season Checklist

Planning season is all about preparation, organization, and reflection. With Climate FieldView™, you'll gain the knowledge and insights to turn your data into actionable decisions. Here are a few key steps to make your planning season more productive.

Scan for a digital version of this checklist.

- 1 Upload Planting and Harvest Data** Before devising a plan for next season, let's learn from the past. Start by uploading your planting and harvest data to see where you excelled, where to improve and why it all happened.
- 2 Analyze and Adjust Yield Data** After uploading data into FieldView, you can analyze or adjust yield data to better understand seed performance by operation, field, hybrid and soil type.
- 3 Create and Share Reports** By creating and sharing reports within FieldView, your data becomes an even more powerful tool towards profitability.
- 4 Compare Critical Data with Side-by-Side Maps** With FieldView, it's simple to visualize multiple data layers at once to see how inputs performed in specific environments.
- 5 Download or Update the FieldView™ Cab App** Download or update the FieldView Cab app in the iOS App Store®. Version 13.3.1 or higher is the one you want.
- 6 Scan Your Seed Bags** If you find typing the actual seed name cumbersome, scan the seed bag to enter the correct name automatically.
- 7 Upload Soil Tests** With FieldView, you can easily import Soil Tests data through the Data Inbox, so you can visualize and compare important information side-by-side.
- 8 Create Custom Prescriptions with FieldView™ Seed Scripts** Finalizing planting plans? Let FieldView Seed Scripts help manage variability on your farm by creating accurate zones with hybrid-specific planting rates.
